

TREE AND SHRUB TRANSPLANTING 5-13-0.3

Description

- Recommended for planting and transplanting trees and shrubs
- Ideal formula for rooting
- Rich in phosphorus (13 % K)
- Contains no synthetic fertilizers

Instruction

For transplanting trees:

Spread throughout the planting hole, six tablespoons (6 x 15 ml) of the fertilizer per tree.

For transplanting shrubs:

Spread throughout the planting hole, two tablespoons (2 x 15 ml) of the fertilizer per shrub.

A container of 400 g covers 5 trees, 15 shrubs or 45 annual and perennial plants (5 m² or 54 ft²).

Tree and Shrub Transplanting 5-13-0.3 should be used as a complement to a complete fertilization program established according to the fertility level of the soil or substrate.

Store in a cool place. Keep out of reach of children
