Can be used
in cannabis

TECHNICAL SPECIFICATIONS

- Active ingredients: Citric acid and lactic acid (present as fermentation products of *Lactobacillus casei* strain LPT-111)
- Packaging: One (1) case = 2 x 10L, also available in smaller size starting from 500ml
- Formulation Type: Liquid concentrate
- Chemical Group: N/A Biopesticide
- PHI: 0 days
- REI: When spray is dry or 4 hours

RECOMMENDATIONS FOR OPTIMAL RESULT

- The spray quality should be very fine. Both sides of leaves should be covered with the product. Use the minimum spray volume to obtain full coverage.
- Apply when conditions are conducive for disease development or at first sign of disease.
- Always read and follow the label instructions.

AEF GLOBAL
Biopesticides

Cyclone

MODE OF ACTION

Cyclone forms a protective barrier on leaf surface that inhibits pathogen development. It also has antifungal effects on conidia germination, germ tube formation and elongation, appressorium formation, hyphae branching and haustorium formation.

USE PATTERN

CROP	DISEASE	RATE	FOLIAR SPRAY VOLUME	APPLICATION TIMING
Cannabis (marihuana) produced commercially indoors	Powdery mildew	1.2% (v/v) Ex. 1.2 L/100 L water	Apply in sufficient water volume to ensure thorough leaves coverage.	Begin application at first sign of disease Repeat at 7-10 days interval under disease pressure

Cyclone is registered in Canada by AEF Global. Please refer to product label for complete application details. Always read and follow label directions. Log on to www.aefglobal.com for full label information
