

Nematode HB

Heterorhabditis bacteriophora

Beneficial nematodes are natural predators. They offer sustainable and effective protection against weevil larvae in strawberry

Biological control tool against Weevil larvae

FEATURES AND BENEFITS

- ✓ **«Pesticide free» solution**
- ✓ **Safe** for workers, pollinators and others beneficial organisms
- ✓ Resistance **management tool**
- ✓ **Integrates perfectly** with your integrated pest management program
- ✓ **Approved** for organic agriculture

Nematode HB

Heterorhabditis bacteriophora

USE PATTERN

CROP	INSECT	APPLICATION RATE	APPLICATION INTERVAL
Strawberry, cranberry, nursery and other cultures	<ul style="list-style-type: none"> • Black vine weevil • Strawberry root weevil 	<ul style="list-style-type: none"> • Spray (matted row): 500 M to 1 billion / acre 	Apply in spring as soon as the soil is warm enough (12 °C) or at the end of the summer (September)

RECOMMENDATIONS FOR OPTIMAL RESULTS

- The soil temperature should be at least 12 °C a few hours a day.
- Treat preferably in the morning or evening, or under a sky covered (if sprayed).
- Apply the entire contents of a unit. Do not divide.
- Apply on moist soil but not soaked
- Put the nematodes in solution in a container of 5 gallons of warm water and shake for 5 minutes.
- Transfer the contents into the sprayer.
- **Remove all sieves and filters from the application system**
- Pressure should not exceed 75 PSI
- The solution must be stirred continuously to prevent the deposit of nematodes.
- Irrigate immediately after application to wash nematodes of the leaves and allow them to penetrate into the soil or substrate without excessive leaching or spray when raining
- Apply on moist soil and maintain for 14-21 days following application.

TECHNICAL SPECIFICATIONS

- **Active ingredient:** Nematodes (*Heterorhabditis bacteriophora*)
- **Package:** 250 million, 500 million or 1 billion
- **Formulation:** Powder
- **Product type:** Biological control agent
- **PHI:** 0 day
- **REI:** No restriction

COMPATIBILITY

Not compatible with Metalaxyl, Myclobutanil
 Compatible with Abamectin, Carbaryl, Cypermethrin, Fosetyl-aluminium, carbaryl.
APPLY SEPARATELY
